TZ Inverter models powerful and efficient

Heating power and efficiency.

- R32 gas environmental friendly
- Wired Controller (optional)
- Complete line-up of standard Inverter models
- Super Quiet! Only 20dB(A)
- High energy savings
- Long connection distance (from 15m up to 30m)

TZ compact indoor size

The TZ indoor units have a new size. With 799mm of width, you can put the air conditioner on the top of the door.

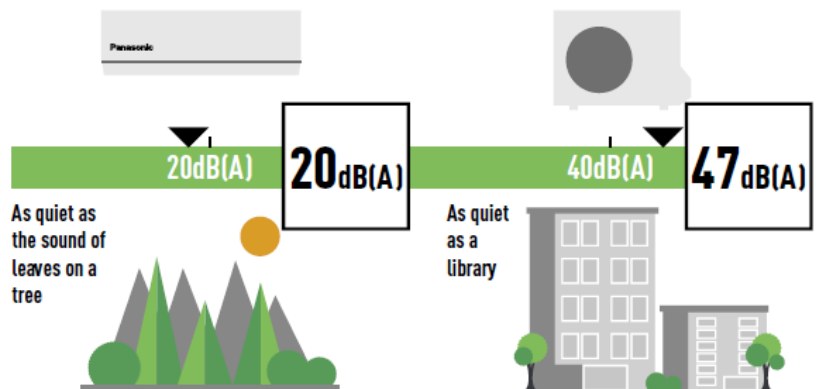

Silent ambient and relaxing atmosphere 20dB(A)

We have succeeded in making one of the most silent air conditioners on the market. Panasonic Inverter air conditioner's indoor operating noise has been reduced as the Inverter constantly varies its output power to enable more precise temperature control.

Quiet Mode reduces operation noise to a quiet 20dB(A)* for a comfortable night's sleep.

Noise is 7dB(A) quieter than during regular operation.

* KIT-TZ20-TKE, KIT-TZ25-TKE and KIT-TZ35-TKE: In the Quiet Mode during cooling operation with low fan speed.

PM2,5

Particulate matter (PM2,5) can be found suspended in the air, including dust, dirt, smoke and liquid droplets. This filter can catch PM2,5 particles including hazardous pollutants as well as house dust and pollen. It is able maintain clean the air of the room by deodorization too.
